

ESTELON PRESS RELEASE [9 April 2024]

FOR IMMEDIATE RELEASE

Introducing the Estelon X Diamond Signature Edition

Estelon proudly unveils its latest masterpiece, the X Diamond Signature Edition. Meticulously crafted and engineered, this limited-edition loudspeaker represents the pinnacle of sonic refinement and aesthetic sophistication. Building upon the renowned legacy of the X Diamond Mk II, this new model pushes the boundaries of audio engineering even further, introducing a host of enhancements and upgrades to deliver an unparalleled listening experience.

Revolutionary Connectors

The X Diamond Signature Edition sports the latest connector innovation derived from the Extreme Mk II model. Unlike conventional binding posts, the custom-built connectors feature a unique clamp-like design. Spring-loaded for optimal cable attachment, these connectors eliminate unnecessary metal-to-metal transitions, ensuring unparalleled purity and clarity from bass to highs. Crafted from precision 3D printed high quality polyamide with no metal parts or high dielectric constant materials to compromise sound integrity, Estelon's proprietary connectors redefine audio connectivity. Adaptable to banana, fork, or bare wire connections, they offer versatility without compromise.

Enhanced Internal Cabling

Drawing inspiration from the flagship models, the Forza and Extreme Mk II, the X Diamond Signature Edition features top-of-the-line Kubala Sosna internal cabling with the Optimiz™ technology architecture. This innovative technology enhances transparency in midrange frequencies and highs, resulting in a larger soundstage, improved separation, and enhanced micro-detail and micro-dynamics. Prepare to be immersed in an extraordinary sonic experience that transcends conventional audio boundaries.

Advanced Filter Technology

The X Diamond Signature Edition boasts an updated filter scheme and topology, incorporating Mundorf Ultra resistors for midrange and high frequencies, and resin-baked coils for bass. These enhancements contribute to a more transparent sound, with every nuance and detail brought to life with astonishing clarity.

Next-Generation Isolation Feet and Spikes

To further enhance performance, the X Diamond Signature Edition is equipped with Stillpoints Ultra SS V2 isolation feet. These innovative components ensure consistent sound quality across different floor types while improving soundstage and bass articulation, with every note rendered with precision and realism.

Exquisite Design

Reflecting the timeless elegance of the X Diamond Mk II, the X Diamond Signature Edition features stainless steel accent details meticulously crafted by hand, adding a touch of sophistication to its design. Its striking black pearl gloss finish is a testament to unparalleled craftsmanship and attention to detail. Each speaker panel proudly bears the signature of Alfred Vassilkov, symbolising his unwavering commitment to excellence.

Technical Specifications

Type: 3-way passive speaker, bass reflex Drivers:

Woofers: 280 mm (11") Accuton, ceramic sandwich dome

Mid-woofer: 173 mm (7") Accuton, ceramic membrane

Tweeter: 25 mm (1") Accuton, diamond inverted dome

Frequency response: 22 - 60,000 Hz

Power Rating: 200 Watts

Nominal Impedance: 6 Ω (min 3.2 Ω at 22 Hz) Sensitivity:

87 dB / 2.83 V.

Minimal Amplifier Power: 20 Watts

Cabinet Material: Marble-based composite

Availability and Pricing

The Estelon X Diamond Signature Edition is a limited edition model, with only 20 pairs available worldwide.

MSRP: 98.000€
